

# Career days

## WHAT DO CAREER DAYS INVOLVE?

- You can try out three different careers in actual companies on three school days. You will have no school on these days.
- This will give you an insight into various careers, enable you to make contact with companies and find out whether you enjoy the work.
- You can gain practical experience and see for yourself what the work is like.
- Before deciding which careers you would like to explore, ask yourself the following questions: What are my interests and strengths?
  - What are my interests and strengths?
  - What am I particularly good at?
  - What are my favourite subjects at school?
  - What are my hobbies?

## HOW DO I FIND A COMPANY?

There are two possible ways of finding a company:

1. You can book a placement via the portal [www.berufsfelder-erkunden.de](http://www.berufsfelder-erkunden.de). Just log into the portal and look for a placement, preferably near to where you live. N.B.: the portal is in German only. Get someone to help you if necessary. And take note of the booking dates.
2. You can also look for a placement yourself, perhaps something that interests you in your personal environment. When you have found a placement, enter it in the portal and at the end of the school year you will receive a certificate showing the careers you have explored.
